Red Wireless Deadbolt

ProdataKey · Model RLDBPKB

A wireless deadbolt with a keypad that adds a door to a ProdataKey Red system without running wire to it. A good fit for apartments, condominiums, dorms and senior living.

Features

- No wire run to the door: the deadbolt talks to a Red Hub wirelessly
- Keypad, Bluetooth and prox credentials on one lock
- One Red Hub connects up to 16 wireless locks
- Managed in the same pdk.io software as the wired doors
- Available in flat black or satin chrome

Satin chrome

The lock family
