Red Wireless Lock

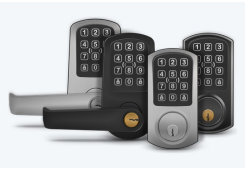
ProdataKey · Model RLC2PKS

A wireless cylindrical lever lock that adds a door to a ProdataKey Red system without running wire to it. Suited to office doors, storage rooms and other doors that are hard or costly to cable.

Features

- No wire run to the door: the lock talks to a Red Hub wirelessly
- Reads prox and high-security cards and fobs, PIN codes, Bluetooth and mobile credentials
- One Red Hub connects up to 16 wireless locks
- End-to-end AES 128-bit encryption
- Managed in the same pdk.io software as the wired doors
- Available in satin chrome or flat black

Flat black



The lock family
